

BRACKET C DG

SET OF WALL BRACKETS FOR MOUNTING SATEL OUTDOOR DETECTORS (DARK GREY)

The **BRACKET C** set of wall brackets is designed for mounting the **OPAL**-series and **AOD-210** outdoor motion detectors. The set consists of two brackets: ball-joint and angled, making it easier to find the optimal position relative to the detection zone.

Each of the brackets is also provided with a tamper switch responding to any attempt to pull the device away from the wall.

Angle bracket:

- for mounting on a flat surface (rectangular pillar, wall, inside corner of two walls)
- tilt angle between detector base and bracket mounting surface: 45°
- tamper element breaking off at an attempt to detach the bracket from the wall

Swivel ball-joint bracket:

- for mounting on a flat surface (rectangular pillar, wall)
- angle between detector base and bracket mounting surface adjustable horizontally through 90° (+/- 45°)
- angle between detector base and bracket mounting surface adjustable vertically through 60° (+/- 30°)

BRACKET C DG is also available in colours: white **BRACKET C**, dedicated for **OPAL**, **OPAL Plus**, **OPAL Pro** and **AOD-210**, and grey **BRACKET C GY**, dedicated for **OPAL GY**, **OPAL Plus GY**, **OPAL Pro GY** and **AOD-210**.
