CA-64 OPS-R

OUTPUT EXPANSION MODULE

An extension module for **VERSA** and **INTEGRA** control panel outputs making it possible to extend a system with 8 additional outputs. Depending on the module variant, this may include "open collector" type outputs, relay outputs or a combination of both these types. **The CA–64 OPS module** is equipped with a back–up power supply (capacity 2.2 A) ensuring additional power to supply alarm system elements.

- system expansion with 8 outputs
    - 8 relay outputs
- switching mode power supply
