

FD-1

WATER FLOOD DETECTOR

The FD-1 water flood detector is provided with a probe on 3 m long wire. The wire can be shortened, as required, to make installation easier and mounting location more suitable for the user needs. The flooding alarm is triggered when the probe electrode comes into contact with water. The detector is also provided with a LED to indicate alarm, as well as with tamper protection against opening the enclosure or tearing off.

FD-1 is designed for installation in bathrooms, kitchens, laundries (at dishwasher, washing machine, etc.), basements and other areas with water installations. It is also an ideal solution to protect rooms with aquarium tank, water bed, etc.

The detector is available in two color versions: white **FD-1** and brown **FD-1 BR**.

- detection of water flood in the areas with water installations
- easy to install external sensor

TECHNICAL DATA

Enclosure dimensions	24 x 110 x 27 mm
Operating temperature range	-10...+55 °C
Nominal supply voltage (±15%)	12 V DC
Standby mode current consumption	2,5 mA
Max. current consumption	4 mA
Weight	81 g
