CZ-USB-1

PROXIMITY CARD READER

The **CZ–USB–1** reader plugs directly to a computer USB port. It enables quick and easy reading of proximity cards, tags, etc. in the **DLOADX** program as well as in **GUARDX**, **ACCO Web** and **ACCO–SOFT–LT** softwares. This makes it possible to assign new 125 kHz passive transponders to the users without leaving the computer.

- operation in Windows environment
- operation at a frequency of 125 kHz
